

Oil & Gas

Strad supports oil and gas drilling and completions projects from start to finish with an extensive lineup of matting and surface equipment rentals. Our everyday goal is to deliver trusted service alongside high quality products that is backed with an industry-leading safety program.

Expertise

We aim to please and it starts with the first call. Our people are here to answer questions and provide thoughtful, flexible solutions that best meet your project scope. Whether it's a question about a specific piece of equipment or the best way to build an access road, Strad can help.

Strad's first-rate service team is committed to providing quality products, outstanding transportation and logistics, and working with customers to help solve any well-site or completions-site need. When it's time for your job to start, Strad will have taken care of all the details to ensure the equipment and mats arrive on time based on your schedule.

Service Excellence - 24/7

Strad is proud of being one of the best in the business and our purpose is to go beyond expectations. Our service crews go through extensive in-house training to ensure that they are the best and safest in the industry. We visit sites regularly for maintenance and service calls to ensure everything is running smoothly.

It is important to Strad that customers are satisfied throughout the whole process. So, our experienced Sales and Logistics teams are always available around-the-clock to help with whatever other needs might arise.
